EDUCATION

Electrical Engineering 2018 – 2023
Omdurman Ahlia University khartoum, sudan

PROFILE

Passionate and detail-oriented Junior Front-End Developer with a strong foundation in HTML, CSS, JavaScript and React as framework. Experienced in building responsive websites and user interfaces, with a focus on clean design and user experience. Skilled in creating interactive components and solving layout or functionality issues. Eager to grow in a collaborative environment and contribute to real-world projects while continuously learning modern tools.

PROJECTS

- Egybest** 🔗 03/2024
A movie website
- Egy Best Clone:**
React, JavaScript, CSS, TMDB API (or your data source), GitHub Pages
- Developed a fully responsive movie-streaming web app inspired by Egy Best, focused on clean UI and user-friendly experience
 - Implemented dynamic routing, movie detail pages, and category filtering using React Router
 - Integrated third-party API to fetch real-time movie data
 - Deployed using GitHub Pages and maintained version control via Git
 - Prioritized performance optimization and accessibility for smooth cross-device use
- Restaurant** 🔗 01/2024
HTML, CSS, JavaScript
- Built a fully responsive e-commerce website tailored for tablet users using pure HTML, CSS, and vanilla JavaScript
 - Designed clean, modern UI with product grid, detailed item views, and an interactive shopping cart
 - Optimized layout and touch interactions for smooth performance on tablet devices
 - Focused on semantic HTML and modular CSS to ensure maintainable and scalable code

COURSES

- HtIm and Css in Elzero Web School (2023)
